---

1. Professional Summary

Manual Tester with nearly 5 years of experience testing complex systems in Contact Center, E-commerce, and Social Media domains. Skilled in requirement analysis, test case design, API testing, and SQL data validation. ISTQB certified with a strong ability to detect critical defects early and collaborate effectively in Agile/Scrum environments.

---

2. Tech Stack / Skills

Programming / Technical:

- SQL (data validation, queries)
- Postman (API testing, basic scripting)

Frameworks / Tools:

- Selenium (basic automation)
- JMeter (performance testing)

Databases:

- MySQL, MongoDB (Robo 3T)

Tools:

- Jira, Redmine, OpenProject
- TestRail, Swagger, Postman, JMeter
- ChatGPT, Claude, Cursor

Knowledge:

- Functional, Regression, Integration, UAT testing
- API Testing (Authentication, Payload Validation)
- Agile/Scrum
- Web & Mobile Testing
- Performance Testing (Load, Stress)
- English: Intermediate (good reading & writing, basic listening & speaking)

---

3. Projects

Project: Contact Center Management System

Role: Manual Tester

Description:

A call center system including IVR, call routing, agent management, and CRM integration.

Responsibilities:

- Tested inbound/outbound call flows, IVR, and softphone UI
- Performed API testing for call logs, agent activities, and reporting
- Executed regression and integration testing

topcv

ỨNG TUYỂN

Achievements:

- Detected critical issues in call routing, preventing production incidents
- Reduced regression testing time by ~30%

Project: E-commerce Website

Role: Manual Tester

Description:

An online shopping platform with cart, checkout, and order management features.

Responsibilities:

- Tested end-to-end flow: product → cart → checkout → payment
- Validated APIs for pricing, discounts, and payment gateway
- Performed database validation using SQL

Achievements:

- Identified a critical payment gateway issue before a major campaign

---

Project: Social Media Platform

Role: Manual Tester

Description:

A social media system with feed, messaging, notifications, and media handling.

Responsibilities:

- Tested features: posts, comments, reactions, user profiles
- Tested real-time systems: chat, notifications (socket-based)
- Conducted API testing for feed, recommendation, and privacy
- Verified media upload and data consistency using SQL

Achievements:

- Discovered a critical privacy defect
- Supported performance optimization for feed loading
