linkedin.com/in/nguyenvanb

SUMMARY

Highly motivated and detail-oriented QA Engineer with nearly 5 years of experience in the banking and enterprise software domains. Specializes in testing front-office banking applications integrated with core banking systems (T24), with strong skills in test design, execution, and defect management using tools like Jira, Xray, and Mindmap. Experienced in analyzing business requirements, collaborating with cross-functional teams during refine and mini review sessions, and validating complex workflows with backend databases (Oracle). Adept at ensuring software quality across various testing phases (SIT, UAT), with a strong sense of ownership, continuous improvement, and commitment to delivering high-quality products.

EDUCATION

VNU University of Engineering and Technology
Bachelor's Degree in Information Technology (GPA: 8.0)
Aug 2017– Aug 2021

SKILLS

- Test design and execution, including functional, integration, regression, and UAT testing.
- Proficient in using test management and bug tracking tools such as Jira and Xray.
- Strong analytical and problem-solving skills with attention to detail.
- Effective communication and collaboration in both independent and team environments.
- Experienced in writing and executing SQL queries for backend data validation.
- Familiar with test automation concepts and tools (e.g., Postman for API testing).
- Knowledgeable in software development lifecycle (SDLC) and agile methodologies.

CERTIFICATIONS

- ENGLISH: B1 VSTEP

WORK EXPERIENCE

Manual Tester Engineer

Paraline (Onsite MBBank) | Oct 2023 - Present

- Led test case reviews and mentored junior testers to improve testing quality.
- Optimized test processes and test case coverage to enhance defect detection efficiency.
- Collaborated closely with developers, business analysts, and product owners to ensure clear requirement understanding.
- Participated in requirement refinement and mini review sessions to clarify acceptance criteria and reduce ambiguities.
- Designed and executed complex test scenarios for core banking and front-office applications.
- Analyzed root causes of defects and worked with development teams to ensure timely resolution.
- Developed and maintained automation test scripts (if applicable) or API tests to improve regression testing cycles.
- Conducted data validation and integrity checks using SQL queries on backend databases.
- Contributed to continuous improvement of QA processes and test documentation standards.

Tester Engineer

VTI | Aug 2020 - Oct 2023

- Assisted in writing and executing test cases based on requirement and design documents.
- Supported functional and regression testing activities, and reported bugs using bug tracking tools such as Jira.
- Collaborated with developers and business analysts to clarify requirements and quickly identify issues.
- Participated in refinement and review meetings to better understand workflows and processes.
- Learned and applied basic testing techniques including black-box and system testing.
- Conducted simple UI checks and data validation on test environments.
- Documented and tracked testing progress to ensure test coverage and status updates.
- Assisted in preparing test documentation and user guides when required.
